

WHAT IS CLAIMED IS:

1. An image recording device, comprising:  
designation means for designating a name of each  
paper discharge tray; and

5 determination means for determining a paper  
discharge tray of paper recording an image based on  
image data read from storage means according to  
attached information read from said storage means for  
storing image data and image data attached information,  
10 and the name designated by said designation means.

2. The image recording device according to claim  
1, wherein said attached information contains any of an  
owner, a date, a title, a destination user, and a  
15 directory.

3. The image recording device according to claim  
1, further comprising display means for displaying a  
name and a load capacity of each paper discharge tray.  
20

4. The image recording device according to claim  
1, wherein said attached information and image data are  
stored in said storage means by a digital camera.

25 5. The image recording device according to claim  
1, wherein said attached information contains a name of  
a paper discharge tray.

6. An image recording method, comprising:  
a designating step of designating a name of each  
paper discharge tray; and

5 a determining step of determining a paper  
discharge tray of paper recording an image based on  
image data read from storage means according to  
attached information read from the storage means for  
storing image data and image data attached information,  
and the name designated in said designating step.

10

7. The image recording method according to claim  
6, wherein said attached information contains any of an  
owner, a date, a title, a destination user, and a  
directory.

15

8. The image recording method according to claim  
6, further comprising a displaying step of displaying a  
name and a load capacity of each paper discharge tray.

20

9. The image recording method according to claim  
6, wherein said attached information and image data are  
stored in said storage means by a digital camera.

25

10. The image recording method according to claim  
6, wherein said attached information contains a name of  
a paper discharge tray.

11. A computer-readable program, comprising:  
a designating step of designating a name of each  
paper discharge tray; and

5 a determining step of determining a paper  
discharge tray of paper recording an image based on  
image data read from storage means according to  
attached information read from the storage means for  
storing image data and image data attached information,  
and the name designated in said designating step.

10

12. The computer-readable program according to  
claim 11, wherein said attached information contains  
any of an owner, a date, a title, a destination user,  
and a directory.

15

13. The computer-readable program according to  
claim 11, further comprising a displaying step for  
displaying a name and a load capacity of each paper  
discharge tray.

20

14. The computer-readable program according to  
claim 11, wherein said attached information and image  
data are stored in said storage means by a digital  
camera.

25

15. The computer-readable program according to  
claim 11, wherein said attached information contains a  
name of a paper discharge tray.

16. A storage medium storing a computer-readable program, wherein said program comprises:

a designating step of designating a name of each paper discharge tray; and

5 a determining step of determining a paper discharge tray of paper recording an image based on image data read from storage means according to attached information read from the storage means for storing image data and image data attached information,  
10 and the name designated in said designating step.

17. The storage medium according to claim 16, wherein said attached information contains any of an owner, a date, a title, a destination user, and a  
15 directory.

18. The storage medium according to claim 16, further comprising a displaying step of displaying a name and a load capacity of each paper discharge tray.  
20

19. The storage medium according to claim 16, wherein said attached information and image data are stored in said storage means by a digital camera.

25 20. The storage medium according to claim 16, wherein said attached information contains a name of a paper discharge tray.
